

Care Instructions

Blue Star Fern

Location:

Partial shade to shade, indoors or outdoors. Bring back indoors when night temperatures drop under 13 degrees C. Likes warmth and humidity.

Watering:

As a rule of thumb, water your kokedama once a week or when it feels light. Adapt the watering depending on the temperature and the ambient humidity: water less frequently in cooler months, more frequently in warmer month. Windy and hot conditions tend to dry the moss ball quicker.

Water the moss ball from the top on the outside of the stems when it's half dry. Don't let totally dry out and don't let sit in water. Spray the foliage in dry weather.

Toxicity:

Not toxic to pets
