

Care Instructions

Japanese Shore Juniper (Juniperus Conferta)

Location:

Full sun. Salt tolerant – coastal friendly. Evergreen

Watering:

As a rule of thumb, water your kokedama once a week or when it feels light. Adapt the watering depending on the temperature and the ambient humidity: water less frequently in cooler months, more frequently in warmer month. Windy and hot conditions tend to dry the moss ball quicker.

Water from the top when the moss ball is nearly dry. Let drain, place back on a stand, plate or saucer. You may trim it.

Toxicity:

Mildly toxic to pets
