

Care Instructions

Maidenhair Vine (Muehlenbeckia Complexa) / Muehlenbeckia astonii

Location:

Full sun to partial shade, indoors or outdoors. Bring indoors in winter in frost-prone areas. Evergreen deciduous. Coastal friendly - salt tolerant. Small white flowers.

Watering:

As a rule of thumb, water your kokedama once a week or when it feels light. Adapt the watering depending on the temperature and the ambient humidity: water less frequently in cooler months, more frequently in warmer month. Windy and hot conditions tend to dry the moss ball quicker.

Prefers moist environment. Keep the moss ball slightly moist by watering from the top as the moss ball becomes half dry. You may sculpt it into shapes or clip into hazy hedges. Otherwise, leave it to grow 'wildly' for a more natural look.

Toxicity:

Non-toxic to humans, cats and dogs
