

Care Instructions

Philodendrons

Xanadu / Rojo Congo / Super Atom

Location:

Medium indirect sunlight (filtered sun to part shade) indoors or outdoors.

Too much bright light and the foliage will become pale and bleached looking.

Too little light and the stems will elongate as the plant stretches towards the light. Likes warmth.

Watering:

As a rule of thumb, water your kokedama once a week or when it feels light. Adapt the watering depending on the temperature and the ambient humidity: water less frequently in cooler months, more frequently in warmer month. Windy and hot conditions tend to dry the moss ball quicker.

Let the moss ball slightly dry between waterings. Water from the top.

Toxicity:

Toxic to cats and dogs
