

# Care Instructions

## Peperomia Clusiifolia 'Emerald' / Peperomia Jade

### Location:

Peperomias like bright indirect sunlight indoors or full shade when kept outdoors. They are not frost tolerant.

### Watering:

Water the moss ball from the top when it becomes dry (the leaves become slightly droopy). Mist the foliage in hot and dry weather. Wipe the leaves regularly with a damp cloth.

As a rule of thumb, water your kokedama once a week or when it feels very light. Adapt the watering depending on the temperature and the ambient humidity: water less frequently in cooler months, more frequently in warmer month. Windy and hot conditions tend to dry the moss ball quicker.

**Toxicity:** Not toxic to cats and dogs (ASPCA)
